Work Experience

Orange Poland

Fullstack Software Engineer - AI & Salesforce Data Integration Team

Warsaw (Hybrid), PL

05/2025 - Present

- Building an **AI-powered chatbot** for both mobile and web, enabling automated company analysis and natural-language interaction with enterprise datasets.
- Designing and developing an API middleware (**Node.js/TypeScript/Java/GCP**) to transform Salesforce CRM data into user-friendly, standardized formats, improving data accessibility and integration across internal applications.

Aexol

Software Engineer - Back End, Product Development Team

Białystok (Remote), PL

01/2022 - 12/2024

- Reduced cloud costs by **65%** by collaborating with the principal developer to configure raw cloud servers using **Kubernetes**. Successfully transitioned 90% of the company's infrastructure from prebuilt machines on **GCP, Azure, and AWS** to custom setups on **Hetzner**.
- Boosted payment system capacity by **20,000%** by developing a Stripe integration library in **TypeScript/Node.js/GraphQL/MongoDB**. This library enabled seamless integration into existing projects, significantly accelerating new project setups and resulting in adoption by 70% of the company's internal projects requiring payment systems.
- Developed developer tool to enhance GraphQL **code quality** and health by testing schemas with a compiler, transitioning schema management to the cloud with logging for team-wide access, and enabling version control for collaborative development. (**TypeScript/React/Node.js/MongoDB/AWS**)
- Accelerated client design delivery by **20%** and improved efficiency by developing advanced algorithms for automatic generation of photovoltaic installation drawings in AutoCAD-compatible formats. (**TypeScript/Python/Java/NestJS/PostgreSQL**)
- Led the development of a small team from initial proof of concept to the launch of a successful SaaS product, resulting in \$10,000 in annual **passive** income. (**Node.js/Next.js/Firebase/GCP/TypeScript**)

Deloitte

Software Engineer Intern (Salesforce), Deloitte Central Europe

Warsaw, PL

06/2021

- Participated in a **4-week Salesforce bootcamp**, gaining hands-on experience with **Salesforce development, customization, and administration**.
- Created custom front-end components using **HTML, CSS, and JavaScript**, delivering a user-friendly and intuitive interface for the CRM tool, ensuring a seamless user experience and gained a foundational understanding of **Apex, SOQL, and Salesforce best practices**.

Education

Bachelor of Computer Engineering

University of Siedlce

Siedlce, PL

Graduated March 2024

- Major: Systems and Database Engineering

About me

Experienced Software Engineer with a strong background in building and operating scalable, distributed backend systems. Proficient in TypeScript and Python, with working knowledge of Java. Passionate about cloud infrastructure (Kubernetes, AWS, GCP) and full-cycle development—from design and implementation to deployment and monitoring.
